

PDF CONVERTER MANUAL

HOW TO USE

This library can convert pdf to:

- PNG files. (**png-outputs** folder)
- HTML files. (**html-files** folder)

You can use the module in two ways:

1. Command-line:

```
node .\index.js --file-path="./manual/PDF_Converter_ReadME.pdf"
```

Arguments:

- **--file-path**: Specify PDF file path here.

2. Calling the function:

- Include the module:

```
const pdfTransform = require('pdf-transform');
```

- Call the function:

```
pdfTransform.convert({  
  fileName: filePath,  
  convertTo: "html"  
});
```

Parameters:

- **filename**: PDF file path
 - **convertTo**: "png" or "html" files
- **Observe the outputs in following folders:**
 - **PNG files**: **png-outputs** folder
 - **HTML files**: **html-files** folder

BIG THANKS TO FOLLOWING MODULES

This module is inspired from following modules:
