

React Native Shimmer Placeholder

Placeholder for both IOS and Android

Get Started

Installation

Step 1: Install react-native-linear-gradient (dependence)

```
npm i react-native-linear-gradient --save && react-native link react-native-linear-gradient
```

or

```
yarn add react-native-linear-gradient && react-native link react-native-linear-gradient
```

Step 2: Install this package

```
npm i react-native-shimmer-placeholder --save
```

or

```
yarn add react-native-shimmer-placeholder
```

Usage

Simple

```
import ShimmerPlaceholder from 'react-native-shimmer-placeholder'  
  
<ShimmerPlaceholder autoRun={true} />  
<ShimmerPlaceholder autoRun={true} visible={isFetched}>  
  <Text>  
    Wow, awesome here.  
  </Text>  
</ShimmerPlaceholder>
```

Connect more components

```
componentDidMount() {
  this.runPlaceholder();
}
runPlaceholder() {
  if (Array.isArray(this.loadingAnimated) &&
  this.loadingAnimated.length > 0) {
    Animated.parallel(
      this.loadingAnimated.map(animate => {
        if (animate&&animate.getAnimated) {
          return animate.getAnimated();
        }
        return null;
      })),
    {
      stopTogether: false,
    }
  ).start(() => {
    this.runPlaceholder();
  })
}
}
_renderRows(loadingAnimated, numberOfRows, uniqueKey) {
  let shimmerRows = [];
  for(let index = 0; index < numberOfRows; index++){
    shimmerRows.push(
      <ShimmerPlaceholder
        key={`loading-${index}-${uniqueKey}`}
        ref={(ref) => loadingAnimated.push(ref)}
        style={{ marginBottom: 7 }}
      />
    )
  }
  return (
```

```

    <View>
      {shimmerRows}
    </View>
  )
}
render() {
  this.loadingAnimated = [];
  return(
    {this._renderRows(this.loadingAnimated, 3,
'3rows')}}
  )
}

```

More Detail see [this](#)

Props

Prop	Description	Type	Default
visible	visible child components	boolean	false
style	Styles applied to the container of Shimmer Placeholder		{background('#ebebeb',overlaid:'hidden')}
width	Width of row	number	200
duration	Duration of shimmer over a row	number	300
height	height of row	number	15

widthLine	percent of line placeholder	number	0.7
reverse	Reverse direction	boolean	true
autoRun	Run shimmer animated at begin	boolean	false
colorShimmer	Color of the shimmer.	string	<i>['#ebebeb', '#c5c5c5', '#ebebeb']</i>
backgroundColorBehindBorder	If you use border in style you have to set background behide(to force Android work).	string	<i>'white'</i>

Methods

Method	Description	Type
getAnimated	get Animated of Placeholder	Animated
