🌟 Overview

unreactpjs is a modern, lightweight JavaScript library for building fast and scalable web applications without the overhead of traditional frameworks.

📦 Features

- ⚡ **Blazing Fast:** Minimal overhead for maximum performance.
- 🔧 **Modular:** Use only what you need.
- 🔗 **Easy Integration:** Works seamlessly with existing projects.
- 📝 **TypeScript Support:** First-class TypeScript definitions.
- 🌐 **Cross-Platform:** Runs everywhere JavaScript does.
